

## *Inventors of the perfect shade*

In 1963 Cornelis Verolme, the famous Dutch shipbuilder and founder of Verosol, sailed into the New York harbour. He marvelled at the impressive skyline and noticed that the towering skyscrapers were mostly clad in glass. He wondered how difficult it would be to keep the indoor climate manageable.

This particular trip inspired Cornelis to find a solution to this problem. He started experimenting tirelessly with many ideas and concepts. He believed that if he could create metal backed fabrics to manufacture curtains and

blinds with, it was possible to reflect heat and glare outside the building, preventing indoor heating. In 1965 Cornelis established the Verolme vacuum metallising company, inventing a process – still unprecedented today – of applying a microscopic thin layer of aluminium to textile.

Regulating heat and light not only results in significant energy savings, but also creates a more comfortable environment for occupants. The ultimate result is our impact on sustainable environments, both indoor and global.

### Visual & Thermal Comfort

Combined heat and light control

### Sustainability

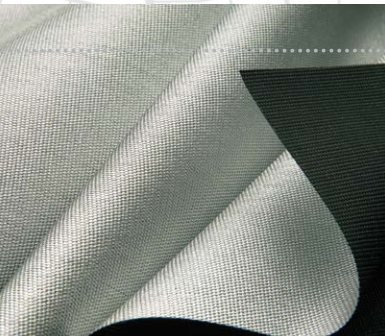

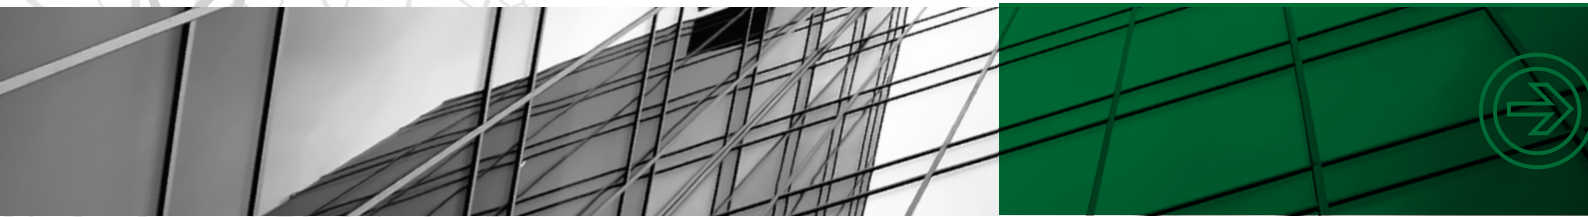

Sustainable use of materials and processes, resulting in energy savings for the end consumer

### Health & Safety

Certified low VOC, antimicrobial, anti-static and flame retardant fabrics

### Privacy

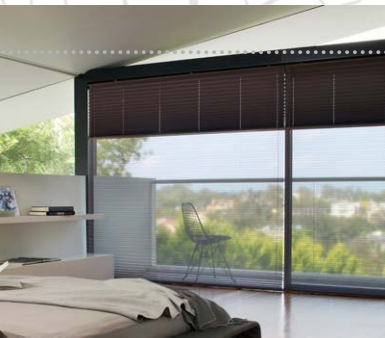

Providing day time privacy whilst maintaining view through

## Metallised Fabrics

Verosol is the pioneer of metallised fabrics, and today we continue to produce inimitable fabrics which offer unparalleled performance. SilverScreen is Verosol's best performing fabric, with a solar reflectance of 78% for superior heat and UV protection, yet excellent view through.

Verosol's Original's Collection offers a comprehensive range of 4 densities. With an exciting release of an additional 23 colours to the core range, Originals will now feature an amazing palette of 36 colours.

## Pleated Blinds

Verosol's signature product – combining the soft appeal of a curtain with the versatility and simplicity of a blind. The ideal solution for heat and light control, Pleated Blinds are simple and elegant, with a small stack height and short projection, giving an uninterrupted view from the window.

Available in an array of different shapes and configurations from triangular to circular, skylights to conservatories, Pleats offer the most versatile solution for windows/doors in homes, offices, boats and commercial settings.

## Roller Blinds

Verosol Roller Blinds are the ideal solution to privacy without losing a stunning view, and they also insulate against heat in summer and cold in winter. With the range and options available for Roller Blinds, there is a complete solution to every window.

Connect multiple or large windows with the Multi-Link or Uni-Joint systems for a completely smooth operation. With the option of chain operation or motorisation, Roller Blinds provide a functional solution to suit any need.

## Contact Us
